 - Assisted in the development and integration of features into the platform.
-

EDUCATION

Master of Computer Application (MCA) **2021 - 2023**

- K K Wagh Institute of Engineering Education and Research, Nashik

Bachelor's in Mathematics **2018 - 2021**

- K. T. H. M College, Nashik
-

ADDITIONAL INFORMATION

- **Languages:** HTML, CSS, JavaScript, PHP, Node.js , Bootstrap
 - **Frameworks:** Codeigniter 4, Laravel
 - **Databases:** MySQL, PHPMyAdmin
 - **Tools :** Postman, XAMPP, VS Code
-

PROJECTS

Etable - (Restaurant Management System)

- Developed backend APIs for restaurant order management, menu handling, and billing.
- Integrated multiple payment gateways (Razorpay, Stripe, Easebuzz, Cashfree) with unique keys per restaurant.
- Implemented wallet-based transactions and admin dashboards for financial reports.
- Built authentication modules for restaurant owners, staff, and customers.

Ticket System (Node.js API Creation)

- Developed an email-to-ticket system with prioritization, task workflows, and a Kanban board for efficient ticket management.
- Built tools for task assignment, tracking, and team collaboration, including email reply features.
- Implemented user roles and permissions to manage access for agents and administrators.

CMMC (CI4 CMS + Frontend)

- Developed a frontend system with login, signup, and inquiry forms.
- Integrated Google Authenticator and AI features.
- Built dashboards for certification levels and controls.
- Enabled file management for tools, SOPs, and implementation tracking.

HR Portal (CI4 CRM + Frontend)

- Developed an HR portal with features for employee management, attendance tracking, leave applications, payroll processing, and performance evaluations.
- Integrated role-based access, automated notifications, and detailed reporting for streamlined HR operations.

Royal Maratha (Laravel API Creation)

- Developed Laravel APIs to handle authentication, user management, biodata creation (PDF/Excel), and matchmaking search.
- Built admin controls and integrated payment gateways (Razorpay)

Visitor Management System (Frontend + Backend)

- Designed a digital visitor registration and tracking system for resorts and villas (e.g., Anand Stays).
 - Built visitor registration forms with photo and document upload features
 - Integrated PDF and Excel export for visitor logs and report generation.
-
